

Praise Egburedi

Lead Web Developer & UI/UX Architect | SiteNoble

egburedipraise@gmail.com * Agency: SiteNoble * Available Worldwide

At SiteNoble, we design and build digital experiences that move businesses forward. With Praise Egburedi directing web development and UI/UX architecture, we help founders and growing enterprises establish commanding digital presence through high-performance websites, intuitive interfaces, and scalable web applications.

TECHNICAL EXPERTISE

Core Development HTML5, CSS3, JavaScript (ESNext), TypeScript	Frontend & UI React, Component Architecture, State Management, Responsive Design
Styling & Systems Tailwind CSS, Design Systems, Typography, WCAG Accessibility	Backend & Data Firebase Firestore, Firebase Authentication, Cloud Functions integration
Workflow & Tooling Git, GitHub, Vite, AI-assisted development	Deployment Vercel, Cloud Run, Production Optimization, SEO best practices

FEATURED PROJECTS & CASE STUDIES

StudPal - Personalized Study Companion Concept Designed and developed a personalized study platform concept combining active deep-work timing, curriculum progress tracking, dependency roadmaps, and AI-assisted concept synthesis. * Engineered high-accuracy timestamp interval calculations to prevent timer throttling across browser tabs. * Architected Firestore schema for persistent study milestones with secure role-based access control. * Crafted distraction-free responsive UI with Apple-inspired minimalist aesthetics and smooth micro-interactions.	React * TypeScript * Firebase Firestore
Aurenix Research - Energy & Climate Platform Concept Structured research platform concept connecting climate hardware innovation, scientific benchmarks, and open-access publications. * Designed modular information architecture with clean tabular data display for complex energy benchmarks. * Built multi-vector domain filter controls allowing zero-latency querying across photovoltaic, microgrid, and hydrogen sectors. * Ensured full accessibility with semantic HTML5 tags and high-contrast WCAG-compliant color distribution.	React * TypeScript * Tailwind CSS

CORE SERVICE OFFERINGS

Business Websites & Redesigns Clean, responsive websites that communicate business value, build credibility, and convert visitors into qualified leads.	Web Application Development Interactive web apps with modular React/TypeScript architectures, database sync, and intuitive user experiences.
Conversion Landing Pages Focused landing pages engineered around clear messaging, user journeys, fast load times, and conversion goals.	UI/UX Design Systems Wireframes, interactive mockups, and cohesive design systems that make digital products clear and easy to navigate.

WORKING METHODOLOGY

Our approach starts with understanding the problem, the people using the product, and the outcome the business wants to achieve. We translate those requirements into clear interfaces, responsive experiences, and maintainable implementations: Discover -> Design -> Develop -> Launch & Refine.
